Forward-Looking Statements

The information presented herein may contain forward-looking statements within the meaning of the federal securities laws. Such forward-looking statements include all statements other than statements of historical fact, including forecasts of trends, market conditions, and other factors that will impact our results of operations. You should not place undue reliance on any forward-looking statements, which speak only as of the date they were made. We undertake no obligation to update any forward-looking statements as a result of any new information, future developments, or otherwise. Forward-looking statements are inherently difficult to predict. Accordingly, actual results could differ materially for a variety of reasons, including but not limited to, macroeconomic changes, including higher inflation and rising interest rates, and difficulties we may have with our fulfillment partners, supply chain, access to products, shipping costs, competition, attraction/retention of employees, search engine optimization results, and/or payment processors. Other risks and uncertainties include, among others, the duration of the COVID-19 pandemic and its ultimate impact on our business and results of operations, the current conflict between Russia and Ukraine and its related geopolitical impacts, problems with our infrastructure, including cyber-attacks or data breaches affecting us, adverse tax, regulatory or legal developments, any negative business impacts associated with our strategy to exit from non-home categories, and whether our partnership with Pelion Venture Partners will be able to achieve its objectives. More information about factors that could potentially affect our financial results are included in our Form 10-K for the year ended December 31, 2021, which was filed with the SEC on February 25, 2022, in our Form 10-Q for the quarter ended March 31, 2022, which was filed with the SEC on May 4, 2022, and in our subsequent filings with the SEC, which identify important factors that could cause our actual results to differ materially from those contained in or contemplated by our projections, estimates, and other forward-looking statements.
